

“Older People Sight Loss Early Detection and Action Workshop” (for Health Care Support Workers and Nursing Students)

At RCN Wales, Ty Maeth, King George V Drive East, Cardiff, CF14 4XZ
on Thursday 28 November 2019
1:30pm – 4:30pm (Registration from 1:00pm – 1:30pm)

Lead facilitator:
Nicola Dunlop,
Adnexal Nurse Consultant, Moorfields Eye Hospital

Aim:

Almost two million people in the UK have significant sight loss. A demographic shift has seen more people living longer and needing support to live with sight loss. This afternoon workshop aims to raise awareness in Health Care Support Workers, Health Care Assistants and pre-reg. Nursing Students to support identification of older people with sight loss and integration of services.

Why is early detection and correction of sight loss important?

- **Sight loss can increase social isolation, add to confusion, increase the likelihood of falls and trips and reduce quality of life**
- **Early detection and correction of can increase the confidence of those affected to once again go out and socialise**
- **Detecting sight loss can prevent misdiagnosis of dementia**

This event is FREE to attend
