

Our purpose

We represent RCN members who work in urgent and emergency care by collaborating with other forums within the RCN and national level professional organisations such as the Royal College of Emergency Medicine (RCEM). Our aim is to provide expert nursing advice and guidance at the strategic level across all four countries to provide safe, high-quality person-centred care. Our priority is to represent the views of our forum members.

Forum Steering Committee members are committed to this purpose and will act in line with their terms of reference and responsibilities.

Our vision

Our vision is that urgent and emergency care nursing staff are able to provide high-quality care to patients no matter where they live in the UK. These settings have safe and effective nursing workforce plans and nursing staff who feel safe, valued, and are appropriately trained, educated, and supported.

Forum Steering Committee Membership

Sarah Cato (Chair)	SC
