Royal College of Nursing

Catalogue of available presentations

The RCN recognises the importance of preserving the historical content of its activity. Indeed, this is one of the objectives of the RCN Knowledge and Innovation Action Plan for 2014 – 2018:

We will continue to grow the nursing knowledge base by proactively collecting, storing and preserving physical and digital content, including the organisational memory of the RCN.

Since 2009, the RCN have asked permission from presenters at the research conference to upload a PDF copy of their presentation onto the conference repository website – in any given year, around 60% of presenters agree to do so. The conference repository website is kept live for two years, allowing easy access to these research presentations. After two years, they are removed from the website, and the PDFs are stored on our servers in RCN Archives, retrievable upon request.

This catalogue lists those presentations from the 2016 research conference for which we have an accompanying PDF of the presentation. It should be read in conjunction with the 2016 Book of Abstracts and 2016 Handbook, which provide a complete overview of the conference programme, including the titles of those presentations where we do not have an accompanying PDF.

To request a PDF, please contact RCN Archives, archives@rcn.org.uk.
