Tuesday 28 January 2025

Dear Nicola Prygodzicz,

On Thursday 16 January, the Royal College of Nursing (RCN) released a harrowing report exposing the devastating impact of corridor care on patients and healthcare professionals in hospitals in Wales and across the UK.

Following this, on Tuesday 28 January, RCN Wales published a policy report setting out our recommendations for action to end corridor care in Wales. They include classifying treatment in a chair lasting over 24 hours as a Never Event, as well as a national review of NHS Wales capacity followed up by investment targeted where it is needed most.

Corridor care—the practice of treating patients in hallways, chairs, or other inappropriate settings—has become a daily reality for many frontline health care workers. Overcrowded facilities, insufficient resources, and high patient demand have forced nurses and other staff to deliver care in environments that compromise safety, dignity, and quality.

Corridor care is happening in your health board. The testimonies below, all from

within your health board, show its impact on your nursing staff, RCN members, and patients.

> *"I am mortified at the way that care is being delivered at the moment. A colleague's 80-something year old father was made to wait in an ambulance for 12 hours. He had obstructions, and possibly cancer. He then got taken to an assessment unit in a trolly in a corridor with ambulance staff."*
>
> *"My daughter, who is pregnant, had hyperemesis and was told to go to hospital. She was vomiting in a corridor, with no heating in the corridor. She had to stay on a trolly for a day and a half before being moved to a ward. Then they moved her to a doctor's office, where there were no buzzers that she could use if she needed help. She was then moved back to the corridor."*
>
> *"My son is in his twenties and was suffering from tonsilitis. He had trouble breathing normally and so went to A&E where he was told that there would be a 10 hour wait and that he'd be better off going back home. He stayed in A&E, where he was sat in a chair overnight and throughout the following day."*

One of your health board's core values is "pride in what we do". I am sure you agree that this is not the standard of care that your health board aims to deliver.

Nursing staff work tirelessly day and night to provide the highest standard of care for patients. But the normalisation of corridor care severely hinders their ability to do that. RCN Wales members are no longer willing to tolerate this unacceptable situation.

This issue needs urgent action at a Welsh Government level, and I have written to the Cabinet Secretary for Health and Social Care to that end. However, action must also be taken at the health board level. Health boards have a duty, under Section 25A of the Nurse Staffing Levels (Wales) Act 2016, to take into account the importance of *sensitive* nursing care. No amount of skill or effort can make corridor care "sensitive". It is inherently intolerable.

Our recommendations published in today's briefing are clear, achievable actions that can improve transparency and ultimately put an end to corridor care.

Given the severity of RCN Wales's concerns, I am urgently seeking your assurance on the actions Aneurin Bevan University Health Board is taking to make sure that

corridor care is eradicated. Specifically, I would welcome details on the following:

- Staffing level increases where areas are above the planed capacity.
- Compliance with the Nurse Staffing Level Act (Wales) 2016 25A and 25B duties.
- Activity on the Welsh Governments 50 Day Challenge and whole system care pathways.

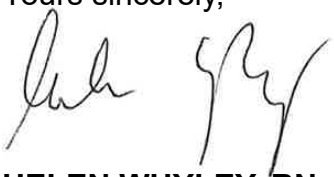
Please provide me with details of all your actions as a matter of urgency.

The lives and safety of patients are at risk.

If you would like to meet with me to discuss this letter, please contact my office as detailed above.

I look forward to your reply.

Yours sincerely,



HELEN WHYLEY, RN, MA
