Tuesday 28 January 2025

Dear Suzanne Rankin,

On Thursday 16 January, the Royal College of Nursing (RCN) released a harrowing report exposing the devastating impact of corridor care on patients and healthcare professionals in hospitals in Wales and across the UK.

Following this, on Tuesday 28 January, RCN Wales published a policy report setting out our recommendations for action to end corridor care in Wales. They include classifying treatment in a chair lasting over 24 hours as a Never Event, as well as a national review of NHS Wales capacity followed up by investment targeted where it is needed most.

Corridor care—the practice of treating patients in hallways, chairs, or other inappropriate settings—has become a daily reality for many frontline health care workers. Overcrowded facilities, insufficient resources, and high patient demand have forced nurses and other staff to deliver care in environments that compromise safety, dignity, and quality.

Corridor care is happening in your health board. The testimonies below, all from

within your health board, show its impact on your nursing staff, RCN members, and patients.

> *"Patient sent to...[a ward]...at approximately 10am, sat in a chair in the corridor by nurses station until 4pm when we could transfer him to a trolley in our out patient bay. He had a bed at 7pm. They were in pain, had profuse bloody diarrhoea...They were for a flexi sig [a flexible sigmoidoscopy] that day, which requires a phosphate enema as prep. How was I supposed to administer enema in a chair in the corridor?"*

> *"The registered nurse told us that she previously had 10 patients to look after plus a corridor patient who was confused and had dementia. She said it was extremely stressful and felt it was not safe. The corridor patient is not on the ward's bed plan they think they are kept on A&E bed plan until they have a bed free on [the ward] to admit. The patient can be in the corridor a couple of hours to most of the day. They are not able to deliver personal care in the corridor."*

Your health board's objectives include "delivering in the right places" and "providing outstanding quality". I am sure you agree that this is not the standard of care that your health board aims to deliver.

Nursing staff work tirelessly day and night to provide the highest standard of care for patients. But the normalisation of corridor care severely hinders their ability to do that. RCN Wales members are no longer willing to tolerate this unacceptable situation.

This issue needs urgent action at a Welsh Government level, and I have written to the Cabinet Secretary for Health and Social Care to that end. However, action must also be taken at the health board level as you have a duty, under Section 25A of the Nurse Staffing Levels (Wales) Act 2016, to take into account the importance of sensitive nursing care. No amount of skill or effort can make corridor care "sensitive". It is inherently intolerable.

Our recommendations published in today's briefing are clear, achievable actions that can improve transparency and ultimately put an end to corridor care.

Given the severity of RCN Wales's concerns, I am urgently seeking your assurance on the actions Cardiff and Vale University Health Board is taking to make sure that

corridor care is eradicated. Specifically, I would welcome details on the following:

- Staffing level increases where areas are above the planned capacity.
- Compliance with the Nurse Staffing Levels (Wales) Act 2016 25A and 25B duties.
- Activity on the Welsh Government's 50-Day Challenge and whole-system care pathways.

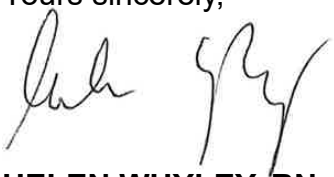
Please provide me with details of all your actions as a matter of urgency.

The lives and safety of patients are at risk.

If you would like to meet with me to discuss this letter, please contact my office as detailed above.

I look forward to your reply.

Yours sincerely,



HELEN WHYLEY, RN, MA
